Govt High School, Guddekoppa. Tirthahalli Tq, Shivamogga Dist.

Date : **Subject : Science** Class: 10B FA 3 **Total Marks :** 20

[chapters covered - 3,7, 10]

I. Choose the correct answer . **1x3=3**

1. A property of the alloy with lead and tin as its constituents is,
   A) Has high melting point B) Has low melting point
   C) Does not rust D) Hard and strong
2. Correct statement about the reproductive cells of human like complex organisms is
   A)Male gametes are larger in size with stored food
   B) Female gametes are smaller in size and motile.
   C)Male gametes are smaller in size and motile.
   D) Female gametes are larger in size and motile.
3. Refractive index of four medium A, B, C and D are 1.31, 1.65, l.44 and 1.50 respectively. The velocity of light is minimum in
   (A) medium B (B) medium D (C) medium C (D) medium A.

II. Answer the following questions in a sentence each. **1x2=2**

4. Write two properties of ionic compounds.
5. State 2nd law of refraction of light.

III. Answer the following questions in two or three sentences each . **2x4=8**

6. Draw the diagram showing the germination of pollen on stigma and label 'male germ cell' and 'stigma'.
7. What is the role of a)ovary, b) Fallopian tube in female reproductive system ?

OR

What is the role of a) testis, b) Prostate glands and seminal vesicles in male reproductive system ?

8. Draw the ray diagram of image formation when the object is kept 'between C and F' of the concave mirror.
9. How does binary fission differ from multiple fission? Give examples for the organisms which reproduce by these methods.

IV. Answer the following question in three four sentence . **3x1=3**

10. a)A concave lens of focal length 20 cm forms an image 15 cm from the lens. How far is the object placed from the lens?
    b) Find the height of the image if size of the object is 6cm.

OR

An object 2 cm in tall is kept on the principal axis of a converging lens of focal length 8 cm. Find the position nature and size of the image formed if the object is at 12 cm from the lens.

V. Answer the following question in four or five sentence . **4x1=4**

11. a)Classify the following oxides into – basic oxides, acidic oxides and amphoteric oxides. Give reason for your answer.- Na_2O, SO_2, ZnO, MgO, Al_2O_3, CO_2
    b) Copper when exposed to air for a long time acquires a green coat. Why?
